- Ramp Test benches for field control of anemobarometric instruments as requested by Airworthiness Authority; support and assistance are guaranteed within 24 hours from the call in any location throughout Italy.

## ***INSTALLATIONS***

There are two available options:  
Avionica undertakes the study of the project, including technical drawings and, upon completion of the installation, delivers the aircraft to customer "ready to fly" or, alternatively, the installation project is completed using the manufacturer's drawings.

With DOA Certification (EASA Part 21) we are capable of classify, design and approve minor modifications and/or repairs on aircrafts A3 (helicopters) and A2 (airplanes).  
Installations and modifications can be carried our either at Florence Airport (Peretola), or any other locations provided it is adequate to Avionica's standards.

## **HELIPADS DESIGN**

Avionica SpA is able to design rooftop and ground helipads for night and day operations, in line with prescriptions set into "D.M. Infrastrutture 01-02-06" and to supply a complete line of systems, accessories and lighting for heliports.

## **AFTER SALES SUPPORT**

Thanks to its technical capabilities, the agreements in place with major manufacturer, its high quality organization and its wide experience, Avionica SpA always provides an efficient after sales support for all supplied services and products continuously assisting its Customers with professionalism, competence, proficiency and short reaction time.

Avionica SpA is able to provide specific logistic support services for maintenance and manufacturing.
